

ABSTRACT OF THE DISCLOSURE

Administration and search and replace of computerized prepress. In one embodiment, a computerized prepress system including four components: a server, a first client, a second client and a printer. The server has stored thereon an authoring program to create a document template, and a translation program to translate a document based on the document template to a suitable prepress format. The first client downloads the authoring program from the server to create the document template, and then uploads the document to the server. The second client creates the document based on the document template, which is uploaded to the server for translation to the suitable prepress format. The printer receives the document as translated to the suitable prepress format from the server.
